Education

Institute of Engineering, Purwanchal Campus, Dharan, Nepal

B. E. in Computer Engineering

March 2023 – April 2027

Projects

Job Tracker

June 2025

Tech: React JS, Tailwind CSS

- A modern and user-friendly job portal application built with React. The platform allows users to add, edit, delete, and track job applications efficiently. It features real-time updates using localStorage, and clean UI/UX for seamless user experience. Ideal for job seekers to organize and monitor their job hunt progress.

Movie Recommender

May 2025

Tech: React JS, Tailwind CSS, Firebase

- Movie Recommender is a responsive and beautifully designed web app that helps users decide what to watch next. Each movie is displayed on a stylish card that shows key details like the IMDB rating, title, and poster with Firebase as BaaS for trending movie.
-

Certifications/Training

- **Responsive Web Design** — FreeCodeCamp, 2024
 - **ACES React Workshop** — ACES, 2024
 - **React Full Course** — Udemy, 2025

Communities

Technical Manager, ACES

Jan 2024 – Feb 2025

- As a Technical Manager in my college's tech society, I oversee project management, organize impactful tech events, and collaborate with developers to drive innovation. My role involves planning and executing workshops, hackathons, and technical sessions while ensuring smooth project execution and team coordination. I strive to create a dynamic environment where developers can learn, grow, and contribute to meaningful tech initiatives.
-

Technical Skills:

Languages: JavaScript, C, C++ | **Frameworks:** React JS, Tailwind CSS

Tools: Git, ThunderBolt
